

Medical Examination Report

Patient:	Arianna Lombardi	Exam Date:	2026-05-23
Fiscal Code:	PTGZ4JFEBZ9SDO78	Report Date:	2026-05-28

Report of the Examination

Patient diagnosed with Coronary Artery Disease (CAD). Presenting with exertional chest discomfort and shortness of breath due to reduced myocardial blood flow. Condition is stable but requires aggressive risk factor modification to prevent myocardial infarction.

Therapy

- Aspirin (81mg daily): Antiplatelet to prevent blood clots. - Atorvastatin (40mg daily): High-intensity statin for plaque stabilization. - Metoprolol (25mg twice daily): Beta-blocker to lower heart rate and reduce cardiac workload. - Lifestyle: Heart-healthy diet, smoking cessation, and moderate - daily exercise.

Additional Notes

Diagnosed CAD
